

# HELLBENT ENGINE

**HORN-DRIVEN HARD ROCK**

## BIO

Hellbent Engine formed in 2025 in Trail, BC. Composed of war horses from across Canada, the players boast 20+ years in the industry. Influences from classic rock, jazz, swing, blues and rock make their performance an eclectic blend of entertaining live music.

Recently playing Blizzard Fest, as part of the Rossland Winter Carnival, followed by several successful and fun local shows, the band is actively pursuing future destinations and stages.

## SOUND

Firmly rooted in Alt/Hard Rock, the band features a two-piece horn section and sounds as if 'Foo Fighters' and 'Thornley' had a 'Chicago' baby.

Accessible for all ages, but can be heavy enough for the headbangers, the audience can expect a diverse and interactive performance with music that is fun, thoughtful and enticing.
